These results were provided to me by the OD Equipment Officer, Graham Urquhart along with a message of thanks to Dave Chandler –

“Many thanks for managing download on the day and sorting the Emits afterwards. I have managed to construct some results using all your good work.

While I have no definitive cause for this, I think from the MERCS file that one of the downloads had an inconsistent time perhaps caused by the handling of daylight saving, which added an hour to some downloads and then meant the next competitor returned before they started. Relays are all treated as timed start, so clock inconstancy is always a problem. I could not fix this in MERCS, and re-downloading just makes things worse, so you can see what I have done, largely using the download reports for the competitors.

I would note that there were no “EMIT errors” for any competitor other than the failure of control 125 which was handled on the day and through the backup cards.

So a big thanks go to Dave and Graham for all their hard work,

The issues with the results have rather overshadowed the brilliant courses planned by Duncan Birtwistle ably controlled by Robert Vickers. A big thanks to those two as well.

The Relay Trophies were presented at Sunday’s (11th November) WMOA Individual Championships in Telford Town Park.
