**23:47:00 Optimum Time**

Thanks to all who volunteered to collect controls, we were out of the park by 8:15pm - I only had to collect three controls myself!

Most competitors seemed to leave happy. I tried to give a variety of legs, some potentially very technical (141-142 and 146-147), some easier but with quite a few route choice options and some just a full speed 'sprint' in a straight line. There certainly seemed to be many discussions at the finish comparing splits and route choice.

A couple of competitors didn't punch at the finish control so have been given their download time – the finish control was placed so as to eliminate the need for sprint finishes across the middle of the car park!
